EXPERIENCE

SYSTEM ENGINEER On-site

BANKBAZAAR.COM | APR-2022 - DEC-2022

- Worked with various teams to gather requirements, designing and deploying new systems, and troubleshooting and maintaining existing systems.
- Maintained servers, software and operating system equipment.
- Provided needs assessment, systems analysis, troubleshooting, resolution and answering questions, resolving problems, and providing training on how to use systems.

FRONTEND PROJECTS

E-Commerce App

[Live](#)[Code](#)

- This is a Full Stack application built using React and Firebase, where users can shop for available products, and can make payments which are linked with stripe, by adding their card details. Added firebase authentication to validate users, used Firebase firestore as database
- Technologies used- React | style-Components | context API | CMS | JavaScript | HTML | CSS | Airtable.

Real-Estate website

[Live](#)[Code](#)

- Developed a Real-Estate website using React with VITE. This Website is completely styled using Bootstrap to make it extremely responsive on all screen sizes and utilizes React-Bootstrap components. Created an appealing login/signup form that is supported by Firebase authentication.
- Technologies used- React.js | Bootstrap | Firebase | style-Components | React Router | JavaScript | HTML | CSS.

Movie Searching App

[Live](#)[Code](#)

- Created this movie-searching website, that allows users to search for movies by title, genre, or other criteria. Used axios for making API calls to the TMDB endpoints for fetching data from its database.
- Technologies used- React | Material UI | web APIs | Axios | React Router | JavaScript | HTML | Vanilla CSS.
